Environmental policy for Stockholm University

These are the main features of the University's environmental policy. It describes the University's vision and aspirations regarding environmental work. The policy in its entirety is available at su.se/environmentalpolicy.

Knowledge and Awareness

- Incorporate environmental and sustainability concerns into curriculums.
- Communicate ongoing environmental and sustainability research.

Resource Use and Emissions

- Minimise negative environmental impact, increase biodiversity on campus and reduce the use of natural resources.
- Take steps according to the Climate Roadmap to reduce the carbon footprint and achieve carbon neutrality by 2040.

Making Demands

- Promote environmental ambitions that surpass the University's mandatory commitments.
- Consider environmental and climate impact in decision-making.

Collaboration

- Engage with stakeholders to promote a sustainable environment, sustainable social development and climate transition.

Encourage

- Encourage and create conditions for employees and students to contribute to the work environment and sustainable development.

Evaluate

- Continuously evaluate and improve the University's environmental practices.
