

# Stockholm University's Climate Roadmap – the University's path towards carbon neutrality

These are the main features of the University's Climate Roadmap for the period 2020 to 2040. The plan is available in its entirety on [su.se/climateroadmap](https://su.se/climateroadmap)

The Climate Roadmap serves as a framework with proposed measures to reach carbon neutrality by 2040. The Climate Roadmap is revised every two years to adapt to legislation, social development and technological developments.

## Describes the University's own emissions:

- Buildings and facilities, procurement and business travel are the largest categories of emissions for the University.

## Proposed measures to manage the University's emissions within:

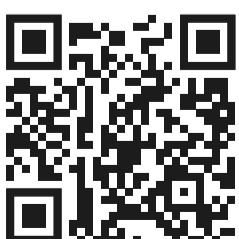

- Buildings and facilities
- Procurement of goods and services
- Business travel
- Negative emissions

## Targets for business travel:

- The University will reduce emissions from business travel by 25% between 2019 and 2025 .

## Proposed measures to contribute to a sustainable and resource-efficient society within:

- Development of new courses and programmes
- Students and student participation
- Academic collaborations
- Partnerships and joint projects
